SIS 2013 Statistical Conference – University of Brescia

Call for Papers for a Special Session on
"New issues in latent variable models: theory and applications"

The special session on " New issues in latent variable models: theory and applications " is aimed at collecting high quality research papers on recent developments in Structural Equation Models, Item Response Theory Models, Multilevel Analysis. The interest is both on methodological aspects and applications in different fields.

This special issue intends to share the debate on these topics with the entire scientific community.

Guest editors:

Stefania Mignani, University of Bologna - Italy, stefania.mignani@unibo.it

Carla Rampichini, University of Florence - Italy, rampichini@disia.unifi.it

Deadline and Review process:

Authors have to communicate their interest in submitting a paper to the special issue to the Guest editors by September 15, 2013.

- Papers are expected by November 30, 2013 but earlier submission is warmly encouraged.
- Manuscripts are expected to be submitted on-line at <http://www.editorialmanager.com/ququ/>
- Notification to authors after reviewing: 30 days after submission (tentative).
- On-line first publication as soon as possible.
- Please contact the guest editors for any further information.
